

**ACTI PACK, specializing in the production of PET and R-PET packaging by ISBM, is keeping enlarging its range of standard products dedicated to food and personal care markets.**

*Innovation and new design have been for 30 years successful key words for Acti Pack!*

Saint-Etienne, the 6th of October 2022 – Acti Pack, specializing for 30 years in the production of PET and R-PET bottles, squeezers and jars, is active on personal care and food markets in Europe. To accompany our customers in their choice of packaging and to offer innovating solutions meeting markets requirements, we are offering a large range of standard products and numerous customized developments.

Lately our new **pills dispensers in PET** are widening our offer. Dedicated to para-pharmacy and nutritional supplements, pills dispensers **VITAL 300 ml** and **VITAMIN 250 ml** are the last born from our standard range. Whereas the model VITAL 300 ml is available with standard screw neck to adapt metal or plastic cap, pills dispenser VITAMIN 250 ml is developed with tamper evident neck and 1<sup>st</sup> opening security.

Acti Pack has been committed for many years to respect and protect the environment and to **ecoconception** demarch of our packaging.

To support our customers, we are offering alternative packaging solutions in using **eco-responsible** raw materials. Then the complete ranges of our PET bottles and jars, standard or customized, are available including PCR PET. On customers' requests, our productions can be made in integrating different rates of **recycled PET from 25% to 100%**.

The RPET material is certified **food contact** and is 100% recyclable!

We are also engaged to propose lightweight solutions to our customers in order to reduce at the maximum the weight of our packaging in maintaining the necessary properties for the packing of products.

Acti Pack and its sister companies will attend the following show:

ALL4PACK in Paris, from the 21st to the 24th November 2022, Hall 5A – Stand F006
